SAFETY INFORMATION

1. The LED module and all its components shall not be subjected to mechanical stress
2. Correct electrical polarity, or module may not be damaged
3. Ensure the power supply is suitable for the total load
4. Electrostatic Discharge (ESD) precautions shall be incorporated when handling or installing the module
5. Installation of LED modules shall be made referring to all applicable electrical and safety standards
6. Modules may be hot to the touch, use caution when handling

INSTALLATION INSTRUCTIONS

IP 20 Strips

1. Cut the strip along the indicated marks according to length of application.

2. Apply thermal tape on the back of the strips with firm pressure, ensuring contact is made.

3. Tape the strip to a smooth, clean surface.

IP 65 Strips

1. Cut the strip along the indicated marks for desired length of application.

- 2) Apply silicone caulk on cut end and attach end cap. Wait 30 minutes for silicone to solidify.

- 3) Secure the strip on its application surface with batten and screws.
